EDUCATION

San Francisco State University
Bachelors of Science, Computer Science

San Francisco, California
May 2023

EXPERIENCE

SFSU CSC 648 - Software Development
Front-End Development Lead

San Francisco, California
January 2023 - May 2023

- Led the design and development of the frontend for the “Crisis Connect” Crisis Alert web application, collaborating with a team to integrate AWS backend.
- Utilized React, HTML, CSS, and JavaScript to create responsive and user-friendly interfaces.
- Presented weekly progress reports, ensuring effective communication, project scheduling, and accountability.

College of Science & Engineering @ SFSU
Teacher Assistant @ Everett Middle School

San Francisco, California
January 2022 - May 2022

- Assisted San Francisco Unified School District teachers in teaching approximately 30 students coding skills, emphasizing HTML, CSS, and JavaScript.
- Promoted communication, creativity, curiosity, and critical thinking in students, enhancing their learning experience.
- Collaborated with college professors and educators to develop curricula and enhance teaching strategies, resulting in improved communication of lessons to students.

Google’s Computer Science Summer Institute Program
Participant/Developer

San Marcos, California
July 2019 - August 2019

- Collaborated with industry professionals and upper division students, kickstarting my journey as a full stack developer.
- Developed JavaScript functionality for the frontend of the project website, learning HTML, CSS, and Javascript.
- Participated in deployment of the application to the Google Cloud Service, allowing users to view the product on presentation day.

PROJECTS

marccastro.onrender.app

- Developing a personal portfolio showcasing my identity, accomplishments, and project portfolio.
- Built portfolio utilizing React, JavaScript, Tailwind CSS, HTML, and launched using Render.

Semi Wrapped

- Created a feature-rich and responsive web application utilizing the Spotify API, enabling users to seamlessly access and explore their top artists, songs, and genres.
- Awaiting a quota extension from Spotify to enable open-source availability.
- Built with React, JavaScript, HTML/CSS, Axios, Express, Bootstrap, and Render.

On The Grind

- Redesigned and improved a previous full stack project of an e-commerce coffee business website, enabling users to view the company products, create/login to an account, and place an order of their favorite coffee beans.
- Utilized React, JavaScript, HTML, TailwindCSS, Axios, Express, Node.js, and MongoDB for the new version.
